

Announcing the Paragon Home Artist A Portable, Fast, Fun Kiln

Discover the fun of making fired ceramic art

Inside the Paragon Home Artist Kiln, heat hardens clay just as it did thousands of years ago for early craftsmen. Paints are transformed into vibrant colors.

Clays and colors become permanent and food-safe inside the Home Artist Kiln. Create heirlooms that will last through generations. When properly baked, a slab of clay embedded with your child's hand prints becomes as permanent as the ancient ware exhibited in museums.

The magic of the heat will continually delight and surprise you. After the kiln has cooled, the transformed ware is never exactly as you expected it.

Children love painting

Children have always loved the excitement of ceramics. Your Home Artist Kiln will pull them away from their computers and video games. Instead of watching TV, they will create beautiful objects with their hands. Your whole family will spend time together shaping and painting clay art.

Projects you can make

The Home Artist Kiln can harden clay and bake ceramic and china paint, gold, and decals. Examples:

- Roll out clay and press it into shapes with a cookie cutter.
- Make ceramic figurines that look like expensive gallery pieces.
- Decorate your bathroom and kitchen with hand-painted ceramic tiles.
- Make ceramic earrings and pendants.
- Embellish ceramic wall hangings with your own poetry.
- China paint plates up to 10" wide.

A ceramic Valentine means so much more than a simple card.

Paint becomes permanent on fired ceramics. Plates that you child painted can be handed down to your grandchildren.

Make original gifts

Not only will you have fun with the Home Artist Kiln, but you will also save money. Instead of fighting crowds to buy gifts, make your own. Grandparents will cherish the objects your children make.

A perfect gift for grandparents: a ceramic picture frame.

Take the Home Artist Kiln on vacation

The Home Artist Kiln plugs into a 15 amp, 120 volt standard household outlet. A built-in luggage carrier snaps upright for easy moving.

Digital simplicity

The Home Artist Kiln operates with the simplicity of a microwave oven. The three button controller heats at the speed and temperature you select. An easy step-by-step instruction guide comes with the Home Artist Kiln so you can program your kiln for the different types of art you create: clay, ceramic paints/glaze, china and decals.

Home Artist Kiln safety features

The stainless steel jacket is vented to lower the surface temperature. A latch holds the lid securely closed. A safety switch is located on the side of the electrical box. A built-in fuse protects the controller.

The firing chamber is made of space-age ceramic fiber. This insulation is noted for energy efficiency.

Ordering information

Create your very own fired works of art for you and family. Visit our website (www.paragonweb.com)

for a list of Paragon Dealers and Distributors, or call us at 1-800-876-4328 for the one nearest you. Take your whole family for a demonstration of this exciting kiln. Get started today!
